

LimeBike Dockless Bike Share

Watertown joined with 15 contiguous communities to host a Dockless Bike Sharing System with LimeBike. Bicycles were available for short-term rental, to help reduce vehicle trips, congestion, and pollution. Dockless bike sharing was a popular way to travel through Watertown this summer and fall. More than 14,000 rides were taken, including on both manual and electric-assist bicycles. Over 5,000 riders rode a total distance of 14,150 miles.

Lime will be removing the bikes for the winter months. We expect to re-launch sometime in March. Lime bikes may still come into Watertown from neighboring communities that choose to remain active all winter.
