New Weekly Public Health Data Report Released

The Command Center released the comprehensive [COVID-19 Weekly Public Health Report](#), including community-specific COVID-19 case and testing data. The report also includes risk categories for each city and town based on the average daily incident rate over the past 14 days. Communities in the high-risk category will receive additional support from the Commonwealth through a cross-agency COVID Enforcement and Intervention Team.

DPH has also posted an archive of previously released city and town data dating back to April on the COVID-19 reporting page. The Weekly Public Health Report also includes data on recoveries, along with detailed case and death data related to long term care facilities. The report also includes information on new nursing facility staff baseline testing, infection control audits, and more. You can also find information related to contact tracing by local boards of health, and the Community Tracing Collaborations, and raw data files, are available by visiting the [COVID-19 Response Reporting page](#).

¹ There is a difference between the Commonwealth’s reported numbers and what the Watertown Board of Health can confirm through the Massachusetts Virtual Epidemiologic Network (MAVEN).

Free COVID-19 Testing in 18 Communities is Extended through October

The state's "Stop the Spread" initiative has extended free COVID-19 testing through October 31. The testing is available in 18 high priority communities across the Commonwealth: Brockton, Chelsea, Everett, Fall River, Framingham, Holyoke, Lawrence, Lynn, Marlborough, Methuen, New Bedford, Randolph, Revere, Salem, Saugus, Springfield, Winthrop, and Worcester. The Stop the Spread initiative is a data-driven targeted effort to reduce the prevalence of COVID-19 in communities that are above the state average in total cases and positive test rates.

Residents can visit the initiative's website at mass.gov/stopthespread to find testing locations and additional information. The Stop the Spread program is intended to provide low barrier, free, and easy to access testing to all Massachusetts residents.
